A Resolution on Climate Change 2007 GS26

A RESOLUTION ON CLIMATE CHANGE

WHEREAS, the impact of global warming, as currently predicted and understood by leading scientists and scientific bodies around the world in reports of the UN's Intergovernmental Panel on Climate Change, as well as in reports of the National Aeronautics and Space Administration and the National Academy of Sciences, will dramatically and negatively alter God's gracious gift of creation;

WHEREAS, the effects of global warming are already clearly evidenced in the melting of glaciers and shrinking of the polar caps, threatening the polar bear with extinction and the Native Peoples of the Arctic with loss of food resources, land, ancient traditions and ways of being in the world;

WHEREAS, experts speak with a profound sense of urgency and clearly state that the window of opportunity to avoid catastrophic climate change is rapidly diminishing;

WHEREAS, the predicted impact of global warming will have a disproportionate impact on those living in poverty, least developed countries, the elderly and children and those least responsible for the emissions of greenhouse gases;

THEREFORE, BE IT RESOLVED that the Twenty-sixth General Synod of the United Church of Christ admits Christian complicity in the damage human beings have caused to the earth's climate system and other planetary life systems, and urges recommitment to the Christian vocation of responsible stewardship of God's creation, and expresses profound concern for the pending environmental, economic, and social tragedies threatened by global warming, to creation, human communities and traditional sacred spaces;

WE FURTHER RESOLVE that the Twenty-sixth General Synod of the United Church of Christ urges the United States Government to respond to global warming with great urgency and firm leadership by supporting mandatory measures that reduce the absolute amount of green house gas emissions, and in particular emissions

of carbon dioxide, to levels recommended by nationally and internationally recognized and respected scientific bodies;

WE FURTHER RESOLVE that the Twenty-sixth Synod of the United Church of Christ urges state and local governments to support and invest in energy conservation and, specifically, in sustainable, renewable and affordable systems of transportation, and calls on business and industry to lead in responses to global warming through increased investments in efficient and sustainable energy technologies that are economically accessible and just;

WE FURTHER RESOLVE that the Twenty-sixth General Synod of the United Church of Christ urges all segments of the Church to address global warming in their decisions and investments and in their educational and advocacy efforts;

TO THAT END, the Twenty-sixth General Synod of the United Church of Christ calls on the Covenanted Ministries of the United Church of Christ, specifically Wider Church Ministries and Justice and Witness Ministries, to address the severe nature of this global warming crisis as one of the most urgent threats to humankind and, indeed, all of God's precious planet earth and that Local Church Ministries develop materials to help churches "green" their buildings.

FUNDING

Funding for the implementation of this resolution will be made in accordance with the overall mandates of the affected agencies and the funds available.
